

— QRM • TRUST

QRM runs where your data needs to live

Choose the cloud and the region. Your data stays there.

Deploy QRM your way

Your cloud

In your own cloud account: Amazon Web Services, Google Cloud, Microsoft Azure or Oracle Cloud, in any region you choose.

Your data center

In your own data center, on your own servers.

QRM cloud

Or in the QRM managed cloud, with nothing to install.

In your own account on

 Amazon Web Services
  Google Cloud
  Microsoft Azure
  Oracle Cloud

Wherever QRM runs

Your data stays where you choose

Your database, files, backups and logs stay in the location you choose. A dedicated deployment serves only your organization.

AI that respects your region

AI features can run in your chosen region or through a model service you approve. Your data is never used to train AI models.

Encrypted end to end

All data is encrypted in transit, and sensitive data is encrypted at rest.

Compliance

QRM's security program is built to SOC 2 and ISO 27001, and a deployment in your own cloud inherits that cloud's certifications.
